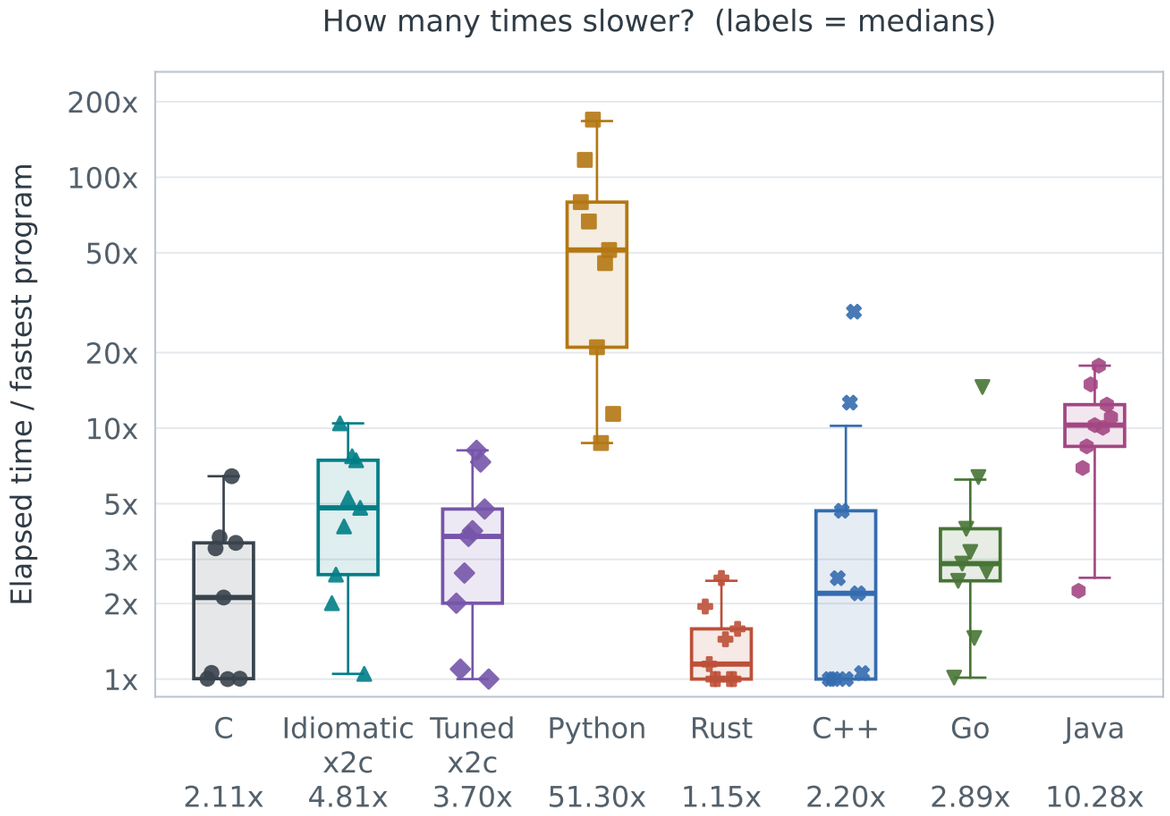
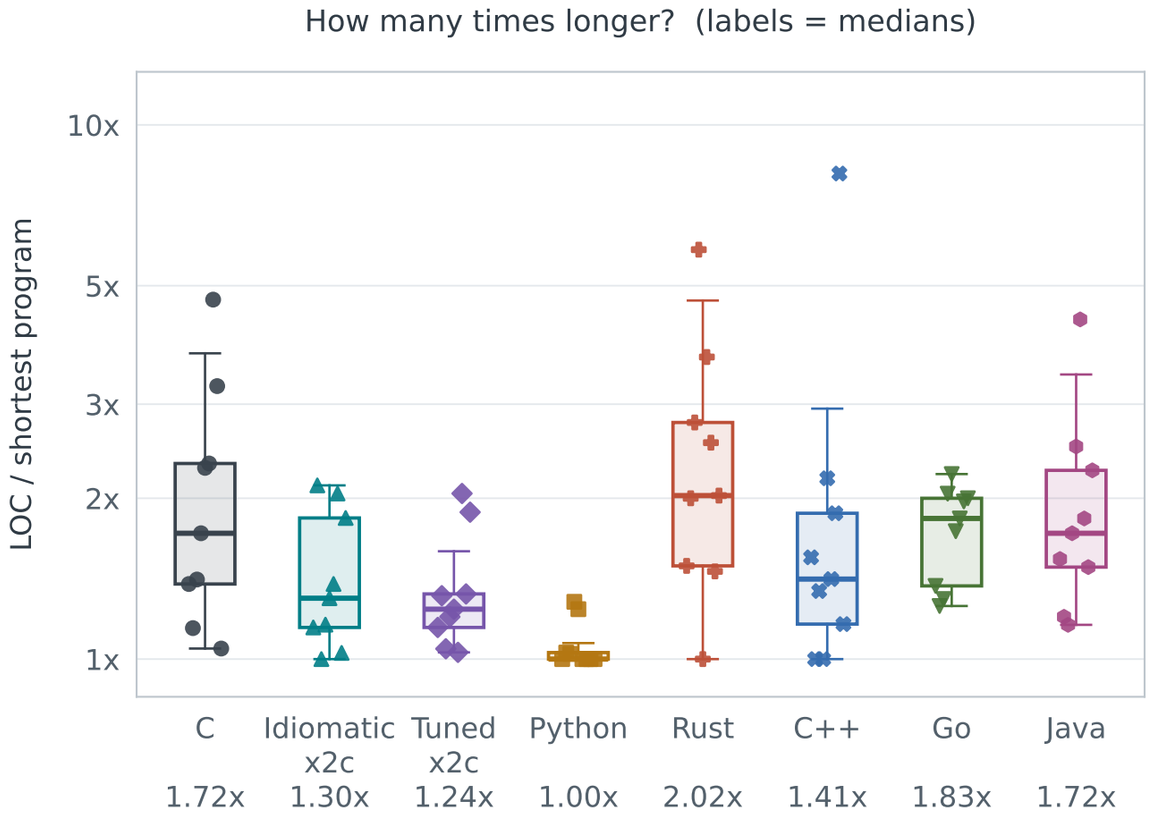
Runtime and LOC across nine shared problems

Benchmarks Game-style box plots | points retain individual problem outcomes
Mixed serial/parallel programs; idiomatic x2c uses threads for trees and spectral-norm.





Apple M4 Max | local inputs | 16-sample wall-time medians | run 20261031T161720Z
Boxes: middle 50% of problem ratios; centre line: median; whiskers: capped 1.5 IQR. Java includes JVM startup and JIT compilation. K-nucleotide is excluded.
