Where each implementation varies

Marceau-style star plots | nine shared outcomes per panel | identical log scales
Parallelism follows official submissions; idiomatic x2c uses threads in three workloads.

Apple M4 Max | local inputs | 16-sample wall-time medians | run 20261031T170749Z
One mark = one problem; spokes meet at the arithmetic centre (+). Grey marks show all 72 shared programs. Java includes startup/JIT.
